

Transport and Highways

Traffic congestion and poor accessibility by alternative modes of transport are often barriers to development. Solving problems of highway access, traffic impact and other issues relating to transport and travel are becoming increasingly important in securing the viability of a project and unlocking a site's potential.

Glanville has developed a wide range of expertise and experience in the following key areas:

- Transport Planning and Transport Assessments
- Traffic Engineering
- Junction and Network Modelling
- Travel Management Plans and Sustainable Transport
- Corporate Relocation Planning
- Parking Studies and Consultation
- Highway Design and Engineering
- Vehicle Turning Assessments
- **Road Safety Audits (see reverse)**
- Accident Investigation
